Many ways to search or browse for products?

Our 'Search Box' has a sophisticated Predictive Search Algorithm based on popular searches to predict your requirement as it is typed 'real time' in the search box. While you type, a drop down list of the most popular search suggestions will appear and change by popularity as more characters and information is added

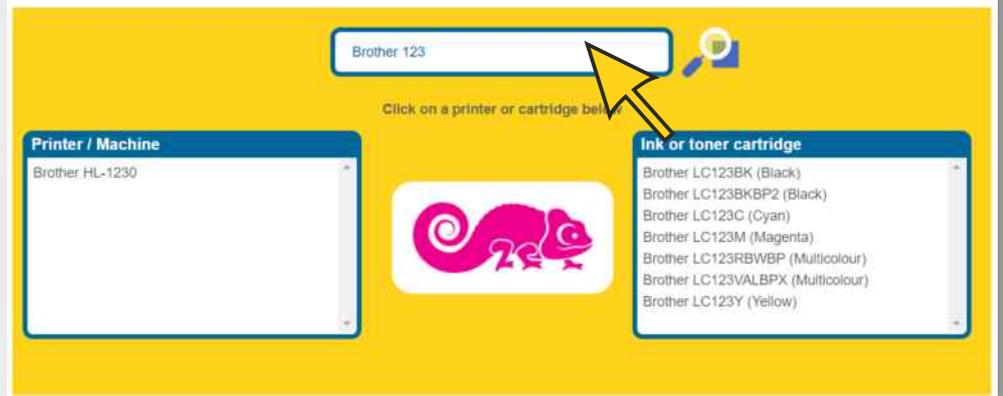

Our 'Search Hover' lets you hover over the main product group lists, and sub-list will appear or our 'Search Images' appears when you click on the Products lists. Also our innovative 'Ink & Toner Finder' uses a similar productive search when you type a cartridge number or printer name into the box

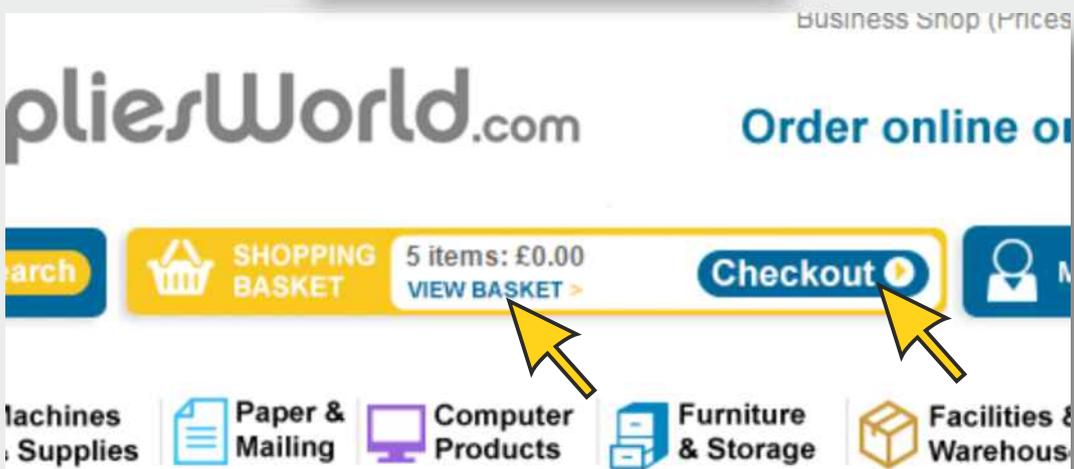

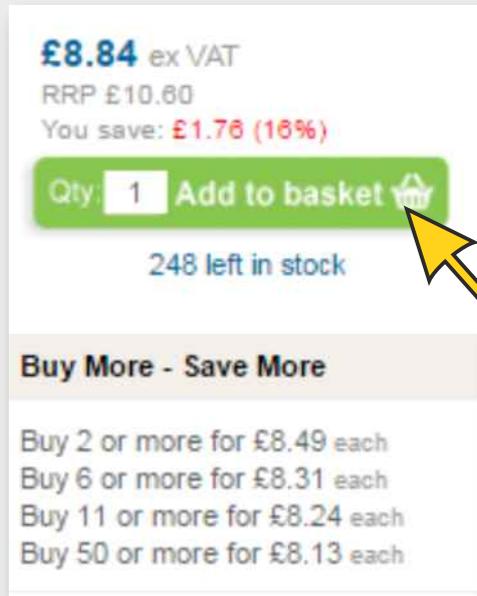

In all cases as you click through as required to narrow down your search, more information, product detail, and pricing will appear

Add Products to Your Basket and Complete your Purchase?

As you narrow down your search and find the products and quantities you require, click the green 'Add to Basket' button and continue shopping until you are ready to complete your purchase by clicking the 'View Basket' or blue 'Checkout' button
